Abstract
Librarians at a college library developed a Peer Research Mentor (PRM) program for undergraduate students in order to facilitate peer learning and expand the library’s formal instruction program beyond the traditional reach of the library and librarians. The presenters will discuss recruiting the initial cohort of eight PRMs, strengthening PRMs’ research skills through an intensive training curriculum, and an overview of the various instructional outreach projects that have been designed and implemented by PRMs for other students. The presentation will discuss program assessment methods, share findings from the current cohort, and outline plans for the program’s development.

Why Peer Research Mentors?

Not because of...

- A merged, one-desk model
- Removing librarians from the reference desk
- Declining questions requiring a librarian
- Increasing number of research consultations
- Increasing time to do liaison work, outreach, etc.
Why Peer Learning?

- Students able to learn from another student outside of the usual faculty-librarian-student hierarchy
- PRMs able to draw upon personal experience to use language more easily understood by other students
- Draw upon social relationships to connect with students who may not otherwise seek help from a librarian
- An established part of Gettysburg’s campus culture
