JCCTL mailer: effective 1st day of class, resource guides!

Colleagues-

As we're finishing a pretty busy few weeks for the JCCTL, I want to invite you to **one more session before classes start** – in fact, a session on *how* to start classes! – and **send you some resource guides (attached to this mail)** from sessions we ran this past week as attachments.

If you're looking for a resource guide for the Trauma-informed Pedagogy session, it's still in the works. If you'd like a link to the recording and/or the slides, please email us and we'll supply links.

Hope to see you Monday, and have a great weekend!

Josef

Strategies for an effective first day of class

Monday, 8/22, 2 PM – 3 PM

Linus Nyiwul (Economics) and Greg Suryn (Chemistry)

How we welcome our students into our classrooms, laboratories, studios, and other learning spaces on the first day of classes can have lasting effects on students' engagement and success in our courses.

Join Linus Nyiwul and Greg Suryn in a discussion on how we can ease our students' transition back into our courses, and make our own lives easier by doing so. Our main topics of conversation will be how we can develop curiosity, build community, encourage learning, and, importantly, define expectations by what we do on the day we meet our students.
